

BREAKER STEELS

HILTI 3000

HILTI 3000

DESCRIPTION	PART NO.	LIST
Moil point - 520mm o/a length	H3000-MP520	£53.88
Narrow chisel - 520mm o/a length	H3000-NC520	£53.88
115mm wide tarmac cutter	H3000-115WTC	£121.54

MOIL POINT

Drop forged from high grade steel, this Hammer Iron with heat treated work areas is used for demolition work and starting holes in the centre of a concrete slab. The most common of the demolition steels used for general breaking where there is not a requirement to control the line of fracture.

NARROW CHISEL

Narrow chisel used in a similar way to the moil point but the line of fracture is controlled along the line of the chisel end. Used on applications where it is important to have a clean edge retained on the work-piece to be broken.

HOW TO SELECT YOUR DURO BREAKER STEEL

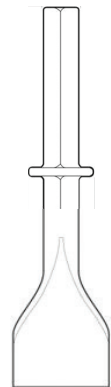

1. Choose the kind of application you need to undertake and therefore the breaker steel type you need to achieve.
2. Then select the machine type you will be using - pneumatic or electric
